

## Dear Sir/Madam,

Since 1999, when I met with computers, I have served in different branches of the business as a Self-taught specialist and Associate Graduate Programmer. Due to the diversity of the customer portfolios of the companies I serve, I had the chance to see different needs and offer suitable solutions in many business types.

Instead of confusing my interlocutors with technical details; I serve with the vision of providing fast, precise, price/performance oriented appropriate solutions with the mission of increasing the efficiency of the company's work flow by working in harmony with different departments.
